

Because Quality  
*should never be a Question*

Is your **COMPANY** ready to  
take **QUALITY** *to the next level?*

Industry leaders recognize the need to replace paper-based systems with mobile software solutions that utilize mobile forms, reports and logs on handheld devices, tablets and laptops that synchronize the captured data to their back-end systems.

Resulting in saving their companies not only time and money, but also by significantly increasing quality control while decreasing their carbon footprint. Consequently making them a greener more sustainable presence in their field.

### **Project Status**

The process of tracking Project required inspections, tasks and subsequent repairs can be an overwhelming task. With WeldLinkpro this process is streamlined and managed by our Data Packet and Job Status Log features. Produce Data Packets for final acceptance.

### **Weld Reject Tracking**

What you don't know is costing you money. Weld rejects can be one of the most costly items on your project. By capturing these rejects, WeldLinkpro can help eliminate these hidden costs by trending rejects by position, process, joint configuration, welder, WPS, filler metal and much more.

### **Cost Savings**

Immediate cost savings are achieved by reducing both hard and soft dollar costs. Including eliminating paper, filing cabinets, floor space, reporting time, document management, travel costs, QA surveillance and customer inquires respectfully.

### **Material Control**

From order placement to final location in the structure material is controlled and managed by the Material Data Log and is directly linked to each weld produced. Integrate bar code technology for easy material identification and traceability.

### **Accountability**

In today's economic environment every dollar matters. WeldLinkpro provides Management the necessary tools to analyze the performance of processes and personnel.

### **Mobile Real-Time Reporting**

Unlike traditional reporting, web-based WeldLinkpro allows for the creation of reports in real-time anywhere in the world. Our Patent Pending reporting process allows for seamless reporting of tasks, inspections and repairs. Effective document control is obtained by our automated revision process.

### **Error Elimination**

Eliminate costly duplicate inspections and reporting, stop unapproved welders, processes and welding procedures from being used on your Project.

### **Certifications**

Welder and Inspector qualifications are maintained and managed ensuring only qualified personnel are engaged in your project. Existing records can be imported if required.

### **Customer Satisfaction**

Developed to be utilized by Fabricator, Contractor and Owner, WeldLinkpro can be integrated into your existing quality system resulting in transparency between all involved parties.

**Weld Repair Tracking**  
**Audit Preparation**  
**Welder Qualifications**  
**Inspector Qualifications**  
**Material Traceability**  
**Root Cause Analyses**  
**Nonconformance**  
**Document Control**  
**Preventative Actions**  
**Weld Reject Rates**  
**Daily Weld Report**  
**Heat Straightening**  
**In-process Inspections**  
**Nondestructive Testing**  
**Bar Code Technology**  
**Acceptance Tagging**  
**Final Placement Of Welds**  
**Paperless Reporting**  
**Instant Document Retrieval**  
**Seamless Printing**  
**Image Uploading**  
**Weld Map Integration**  
**Consumable Control**  
**Electronic Signature**
